

Dry D1 Surgical scrub brush

STERILE EO

PRODUCT SPECIFICATIONS

Dry D1 Surgical scrub brush

Hand hygiene is the basis of correct and effective infection prevention in the hospital environment. Surgical hand antisepsis, to destroy transient micro-organisms and inhibit the growth of resident micro-organisms, is routinely carried out before undertaking invasive procedures. Antisepsis may reduce the risk of surgical site infections in patients.

Description:

D1 DRY is a single use brush/sponge with nail cleaner **without** detergent. Sterilised by ETHYLENE OXIDE (EO). Single Use. Expiration: 5 years.

Indications:

Surgical scrubbing of hands for antiseptic pre-op procedures. D1 DRY is compatible with any detergent or antiseptic cleansing solution.
